

Reality Well partners with Chinese Retirement Homes Community Mon Sheong for improving quality of life for residents with Virtual Reality.

Reality Well and Mon Sheong Foundation met several years ago before we had even begun developing the Reality Well platform. We discussed immersive technology and how it would be able to impact seniors' lives in their residences. Well before the platform was underway we showcased 360 video content to Mon Sheong and they were thrilled with the potential impact custom content would have for them.

Several years later and after multiple events and active pilots, Mon Sheong is now looking to work with Reality Well to bring custom-built “Asian-inspired” content to the Reality Well platform and to their residents.

“We continually add valuable content to our platform from all around the world and our goal is to work with facilities to provide unique content that resonates with their residents. The more quality and memorable content we can provide the better”, says Lorne Fade, Co-Founder of Reality Well.

While it is still early in talks for our partnership with Mon Sheong, we are continuing to work with them to curate custom content that will aid the quality of life for their residents all around the world.
